Github: github.com/ramsinghyadav44 Mobile: +91-6393538339

## Skills

- **Programming & Scripting**: C++, JavaScript, Python, Flutter, Java
- **Cloud Platforms:** Amazon Web Services , Microsoft Azure, Oracle,Google Cloud Platform
- **DevOps & CI/CD:** Git, GitHub, GitHub Action, Docker, Kubernetes, Jenkin, ArgoCD
- **Infrastructure as Code (IaC):** Terraform, Ansible, AWS CloudFormation
- **Monitoring & Logging:** Prometheus, Grafana, AWS CloudWatch
- **Web Technologies:** Node.js, Express.js, React.js, HTML5, CSS3, Tailwind CSS, MongoDB
- **Soft Skills**: Problem-Solving Skills, Team Player, Project Management, Adaptability, Agile Mindset

## Projects

**Kubernetes-Based Voting Application | GitHub** Jan 2026-Feb 2026

- **Built and deployed** a containerized microservices-based voting application on a **3-node Kubernetes (Kind) cluster** using **Docker**, configuring Deployments and Services to implement scalable multi-tier architecture and real-time result processing.
- **Implemented GitOps-based** continuous deployment using **ArgoCD** with auto-sync and self-healing, improving deployment reliability and reducing manual intervention by **50%**.
- **Deployed** the Docker-containerized application on **AWS EC2** and integrated **Prometheus and Grafana** using **Helm** (kube-prometheus-stack) to monitor CPU, memory, network, and pod-level metrics, improving system observability and reducing troubleshooting time by 40%.
- **Tech stacks**: Kubernetes (Kind), Docker, Helm, ArgoCD, Prometheus, Grafana, AWS EC2, Redis

**CrowdSense – Real-Time Crowd Monitoring Platform | GitHub** Oct 2025 – Dec 2025

- **Designed and developed a real-time crowd monitoring platform**, enabling users to visualize and analyze crowd density through interactive maps.
- **Engineered** real-time, event-driven data pipelines with geospatial querying to deliver live location-based insights, increasing user engagement by 25%.
- **Enhanced** system performance by optimizing data queries, API response handling, and rendering pipelines, resulting in a 45% improvement in real-time data visualization speed.
- **Tech stacks**: React (Vite), Tailwind CSS, Java, Spring Boot, MongoDB, Docker, Render, Vercel

**Containerized Flask Web Application | GitHub** Aug 2025 – Sep 2025

- **Created and Elevated a Flask-based web application**, with clean backend architecture, RESTful API design, and modular development, achieving a **48% improvement in performance and scalability**.
- **Containerized and deployed** the Flask application using Docker and Kubernetes, improving scalability and reliability, and delivering **a 40%** increase in deployment efficiency and system uptime.
- **Enhanced system reliability and performance** through CI/CD integration, automated testing, and monitoring, resulting in a **35%** reduction in deployment time and improved release stability.
- **Tech stacks**: Flask, Python, Docker, Docker Compose, Kubernetes, YAML, Nginx, Git/GitHub, Linux

## TRAINING

**Cipher School | Mobile Application Development | Certificates** Jun 2025 – Jul 2025

*Trainee*

- **Completed Flutter Mobile App Development training** and built a Student Grievance Portal using Flutter and Firebase authentication, real-time data handling, push notifications, and responsive UI design.
- Successfully developed a functional prototype of the **Student Grievance Portal**, demonstrating skills in real-time data management, authentication, and responsive design with a **20% improvement in user workflow efficiency**.
- **Tech stacks**: Flutter, Dart, Cloud Firestore, REST APIs, Android Studio, Git

## Certifications

- Cloud Infrastructure 2025 Certified Architect Associate | Oracle Oct 2025
- Cloud Infrastructure 2025 Certified Multicloud Architect Professional | Oracle Oct 2025
- Privacy and Security in Online Social Media | NPTEL Oct 2025

## Achievements

- **AWS Academy Cloud Foundation Course Completion Badge** Jun 2025
  - Earned after successfully completing the AWS training course and its hands-on labs.

## EDUCATION

- **Lovely Professional University** — Punjab, India
  *Bachelor of Technology - Computer Science and Engineering;* ***CGPA: 7.54*** — *Since August 2023*
- **Government Inter College** — Prayagraj, Uttar Pradesh
  *Intermediate;* ***Percentage: 70%*** — *April 2022 - March 2023*
- **St. Xavier's Senior Secondary School** — Sultanpur, Uttar Pradesh
  *Matriculation;* ***Percentage: 79%*** — *April 2020 - March 2021*
